## INSTALLING A UNIFLOSS STAND

There are two halves to the Unifloss Stand. For **free-standing** installations, use the base and merely set the unit's top half on it, as shown in the drawing below. For **in-counter** installations, place the top section of the Unifloss Stand over a cut-out in your countertop. A shelf is required under the counter to set the floss machine on. For countertop cut-out size and shelf location, request drawing numbers B-3374 and C-3418 from Gold Medal Products Company.

After the top half of the Unifloss Stand is in position, tilt the floss machine and position the spinner head in the center of the cut-out. Make sure shipping support angles are removed as indicated in the installation section of this manual.

Place the spun aluminum pan over the floss head of the machine. Re-center the machine to provide equal spacing between the pan and cut-out.

After connecting the power supply cords, you are ready to make cotton candy. See OPERATING INSTRUCTIONS in the floss manual.

## ELECTRICAL REQUIREMENTS

All export Unifloss Tops are equipped with a 16 amp, 230 volt power supply cord for use with single phase A.C. current. These units must be grounded in accordance with local codes.

## CHECKING SHIPMENT

Remove carton from Unifloss Top. Check unit thoroughly for any damage which may have occurred in transit. Claims should be filed immediately with the transportation company. Remove all tape and packing material.
